## Surveyors & Planners

Ideal Business/Accounting Solution

### Improve your...

- » Accounting, job costing and integrated timesheet management
- » Ability to track time and disbursements against jobs
- » Project invoicing, quoting and timesheet entry for staff
- » Operational efficiency and profit analysis

*"Spencer Holmes Ltd are a multi-discipline firm of 35 professionals and support staff offering engineering, survey and planning services. When upgrading our accounting software we looked at a variety of packages. ABM offered significant advantages to our practice. We agreed to work with developers to create a time cost module more suited to the needs of professionals who record time and disbursement costs at job level. We were looking for a spreadsheet style application which was easy to use, simple to maintain and allowed each staff member to enter their own timesheets daily. The application comes with a Job Management Viewer, which allows us to review the time charges, disbursement costs, accounts payable and accounts receivable etc. We are very pleased with the result that has been achieved."*

## ABM

### ADVANCED BUSINESS MANAGER

ABM has been designed and developed by accountants and IT professionals to be the next generation of accounting software for progressive businesses.

Building on the past principles of accounting software and paying close attention to the demands of today's business environment, ABM is the innovative accounting and business management system suited to Surveyors and Planners. Using the latest technology and integration facilities, ABM is a flexible and advanced management system which streamlines the running of your business with its array of insightful features.

Particularly useful are ABM's job costing and reporting features, currently being used in today's consulting industry.

Included in the package are ABM's optional modules, Job & Timesheeting, Project Invoicing and Business Intelligence, providing an integrated workflow for efficient cost tracking and billing with sophisticated business analysis.

## JOB & TIMESHEETING

Designed to provide a mechanism for a medium to large number of staff entering timesheet information against jobs and projects, using a flexible and efficient entry method. The module has the ability to set up and charge disbursements to jobs and comes with an enhanced job management viewer for monitoring purposes. Reduce the unnecessary effort and hassle of daily time management, while creating streamlined processes for billing and job management.

## PROJECT INVOICING

The module allows you to invoice charges to a job according to variable criteria, allowing fast, flexible and simple invoice or draft invoice creation for customer projects and jobs. It lets the user choose the amount to invoice, and the value of work in progress to be written off.

## BUSINESS INTELLIGENCE

Identify the strengths and weaknesses of your business through analytical assessment, costs and revenue comparisons, ratio and bottom line analysis, customer and staff performance review, and a range of in-depth analysis tools. With the aim to improve business efficiency and profitability, the module focuses on delivering relevant information through flexible data mining as well as easy to interpret visually attractive interfaces.
