“ABM is absolutely brilliant and marvellous”

- Steve Culevski
Pertronic Industries

Introducing a fully integrated business and accounting solution ideal for wholesale and distribution*

ABM

ADVANCED BUSINESS MANAGER

Advanced Business Manager (ABM) has been designed and developed by accountants and IT professionals to be the next generation of accounting software for progressive businesses.

Building on the past principles of accounting software and paying close attention to the demands of today's business environment, ABM is an innovative accounting and business management system. Using the technology and integration facilities, ABM is a flexible and advanced management system which streamlines the running of your business with its array of insightful features.

Particularly relevant are ABM's inventory and reporting features, currently being used today.

Included in the package is ABM's optional modules, Warehousing, Structured Stock, Asset Management and Business Intelligence, providing an integrated workflow for efficient on-site service delivery with sophisticated business analysis.

WAREHOUSING

Logical control and organisation of stock, allowing users to create a hierarchal structure in each warehouse with multiple aisles, bins, etc and a waiting area for goods not yet put away.

STRUCTURED STOCK

Used to cater for businesses whose stock requires a "segmented" structure. The module allows the business to set up product types in ABM with each collection containing segments, such as styles, colours, sizes, weights, dimensions, etc.

ASSET MANAGEMENT

Designed to provide comprehensive tracking of fixed assets within one or multiple businesses. With a great deal of flexibility, the module is simple to operate and caters for a variety of assets with extensive reporting and costing options available.

BUSINESS INTELLIGENCE

Identify the strengths and weaknesses of your business through analytical assessment, costs and revenue comparisons, ratio and bottom line analysis, customer and staff performance review, and a range of in-depth analysis tools, through flexible data mining and visually attractive interfaces.

TALK TO US TODAY

Contact us today to arrange for a no obligation demonstration of the ABM Wholesale & Distribution Package and find out if the ABM solution is the right choice for your business.
